Energy performance certificate (EPC)				
14, Ryders Way Rickinghall DISS	Energy rating	Valid until: 19 August 2027		
IP22 1ER		Certificate number: 2608-0074-7268-5933-5900		
Property type	Semi-detached house			
Total floor area		72 square metres		

Rules on letting this property

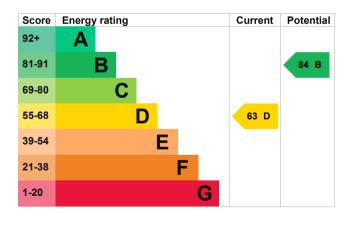

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (<u>https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</u>).

Energy rating and score

This property's current energy rating is D. It has the potential to be B.

<u>See how to improve this property's energy</u> <u>efficiency</u>.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, as built, insulated (assumed)	Good
Roof	Pitched, 200 mm loft insulation	Good
Window	Fully double glazed	Average
Main heating	Boiler and radiators, electric	Average
Main heating control	Programmer and room thermostat	Average
Hot water	Electric immersion, off-peak	Average
Lighting	Low energy lighting in 11% of fixed outlets	Poor
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	None	N/A

Primary energy use

The primary energy use for this property per year is 484 kilowatt hours per square metre (kWh/m2).

How this affects your energy bills

An average household would need to spend **£900 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £224 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2017** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 8,649 kWh per year for heating
- 1,950 kWh per year for hot water

Impact on the environment This property produces 5.9 tonnes of CO2 This property's current environmental impact rating is F. It has the potential to be D. This property's potential 3.5 tonnes of CO2 production Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they You could improve this property's CO2 produce each year. CO2 harms the environment. emissions by making the suggested changes. This will help to protect the environment. **Carbon emissions** These ratings are based on assumptions about An average household 6 tonnes of CO2 average occupancy and energy use. People produces living at the property may use different amounts of energy.

Changes you could make

Step	Typical installation cost	Typical yearly saving
1. Floor insulation (suspended floor)	£800 - £1,200	£59
2. Low energy lighting	£40	£40
3. Heating controls (TRVs)	£350 - £450	£36
4. Solar water heating	£4,000 - £6,000	£62
5. High performance external doors	£1,500	£28
6. Solar photovoltaic panels	£5,000 - £8,000	£305

Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.
